 **8:30pm - 10:30pm**

Messing around with Film

 Riverside A (415 1st Ave, Seaside, OR 97138)

A little history, a little less mystery, and—if we can—a little chemistry! This panel is for anyone curious about film photography, whether you've never touched a roll of film or you've been shooting for years. We'll explore what a camera really is, how film came to be, why it still exists in a digital world, and why it gets so much love. Along the way, we'll look at real cameras, real film, and real photos—from the earliest processes to modern film stocks. If there's time, we'll even develop a roll of film live. No experience required.

 **9:00pm - 10:00pm**

Open Bounce

 Pacific Room (415 1st Ave, Seaside, OR 97138)

We make the most of the bouncy castles while we have them at Get Out The Float! Early in the convention, time on the castles is set aside for convention staff. Further in to the convention, we have Sponsor Bounce, Patron Bounce as well as Fursuit Bounce. In addition, the bouncy castles may make unique seating with uniquely bad views of the main stage during Opening and Closing Ceremonies. -Bouncy Castle Rules- 1. Primary entrance to the Pacific Room is through Badge & Shoe check area. The use of other doors is for staff or emergencies only. 2. Badges, badge clips, shoes, spikes, pins, and any other sharp objects must be checked and stored at Badge & Shoe check to reduce risk of injury or damage to property. 3. No running on the polished concrete floor. It hurts. We checked. 4. Bouncy house are made for jumping on; inflatable toys are not. 5. Inflatable toys are not allowed in bouncy castles during open bounce. 6. No horseplay or rough housing in the area. It can hurt. We checked. 7. Be sure to respect others & respect the property of others. 8. Follow instructions from staff. 9. If main lights are flipped on & off several times in a row and/or the music stops, stop bouncing for these are signs we need to get everyone's immediate attention. 10. One castle will have a sign near its entrance designating it the "vibing castle." Please respect those who want to feel the wubs; so do not bounce on this castle if it has occupants. 11. If a bouncy castle is overloaded, it will lose pressure and begin to deflate under the weight. Do not bounce on a castle in such condition. 12. Lost and found for bouncy castle area is at Badge/Shoe check; however lost valuables will be taken to F.L.A.R.E. as soon as they are discovered. 13. Youth should be supervised by their guardians. Kids and other adults should use caution if using the same castle at the same time. 14. If you see anyone not following these rules, inform the staff immediately.

Fursuit Figure Drawing

 Riverside B (415 1st Ave, Seaside, OR 97138)

Come draw fursuiters as they pose for you. If you're in fursuit, you can come model, too! Props encouraged for models. Bring your own art supplies and sketchbooks.

 **12:30pm - 1:30pm**

Hand-sewing with PVC Fabric

 Sandollar AB (415 1st Ave, Seaside, OR 97138)

Most people sew with a machine, but hand-sewing has lots of advantages, and for weird fabrics and fussy details it can be superior. It's also easily portable, making it ideal for a work-shop style presentation where attendees will be able to follow along. I plan on bring my giant scrap box and photo-copies of a few simple ear patterns, plus lots of needles and thread, and everyone will be able to come away from the panel with a pair of ears ready to be attached to a headband or hat.

 **1:00pm - 1:30pm**

 **7:30pm - 9:30pm**

The Science of Softness - Exploring Plasticizer, The Key Ingredient to Soft Vinyl

 Riverside B (415 1st Ave, Seaside, OR 97138)

Get ready for a friendly, approachable deep dive into one of the most important parts of vinyl chemistry. Plasticizers are the unsung heroes that make our toys soft, flexible, and alive with that signature feel we all love. In this session, we'll explore what plasticizers actually are, how they work inside vinyl, why different types behave differently, and how all of this affects the way toys age, stretch, soften, or become brittle over time. We'll walk through the major plasticizers used in today's pool toys, compare their strengths and weaknesses, and break down common myths you've probably seen floating around the community. Whether you're a casual collector, a hardcore restorer, or someone curious about why some toys stay soft for twenty years while others lose their magic, this panel will give you a clear, grounded understanding of what's really going on beneath the surface. You'll leave with real, practical knowledge: how to identify different plasticizer behaviors, how to care for aging vinyl, and what restoration methods actually work. No chemistry degree required, just curiosity and love for the toys that keep us afloat.
